

# BREAKBULK

EUROPE 16-18 JUNE 2026

EXHIBITOR MANUAL

Dear Exhibitor,

We're delighted that you will be exhibiting with us at Breakbulk Europe from 16<sup>th</sup> to 18<sup>th</sup> June 2026 at Rotterdam Ahoy in Rotterdam, the Netherlands.

Breakbulk Europe brings together industry professionals from across the project cargo and breakbulk supply chain, with decision-makers from EPCs, manufacturers, logistics, transport and procurement at the centre of the event.

We understand it takes a lot to coordinate your stand; for this reason, we've created this Exhibitor Manual—a one-stop guide containing all the vital information you need to exhibit at the show.

Please take time to read through all the information and instructions provided, including show timetable listed on page 4 and official show partner and supplier contacts on page 7.

A little time spent now coordinating your participation will help ensure a smooth experience onsite. Please keep an eye out for the ordering deadlines, as the prices do increase significantly after the deadlines have passed.

Please feel free to contact Breakbulk Support at any time if you have any queries regarding exhibiting.

Their contact details:

Email: [breakbulksupport@breakbulk.com](mailto:breakbulksupport@breakbulk.com)

Telephone: +44 20 3545 9605

We look forward to working with you over the coming months and to welcoming you to the event in Rotterdam for the June 2026 edition.

Best wishes,

David Langrish  
Event Director  
Hyve Group Plc

Saturday, 13 <sup>th</sup> June 2026	08:00 - 18:00	Contractor access for Space Only stands (Halls 1 & 2)
Sunday, 14 <sup>th</sup> June 2026	08:00 - 18:00	Contractor Access for Space Only stands (Halls 1 & 2)
	13:00 - 18:00	Contractor access for Space Only stands (Hall 8)
Monday, 15 <sup>th</sup> June 2026	08:00 - 22:00 10:00 - 22:00	Space Only stand construction to be completed by 22:00 (All Halls)  Access for Shell Scheme exhibitors (All Halls)
Dates - Registration	Registration Open Times	
Monday, 15 <sup>th</sup> June 2026	10:00 - 18:00	
Tuesday, 16 <sup>th</sup> June 2026	08:00 - 20:00	
Wednesday, 17 <sup>th</sup> June 2026	09:00 - 18:00	
Thursday, 18 <sup>th</sup> June 2026	09:00 - 16:00	
Dates - Exhibition Open	Exhibitor Access Times	Show Open & Visitor Access Times
Tuesday, 16 <sup>th</sup> June 2026	09:00 - 20:00	11:00 - 17:00 (Exhibition) 17:00 - 19:00 (Welcome Reception)
Wednesday, 17 <sup>th</sup> June 2026	09:00 - 19:00	10:00 - 18:00
Thursday, 18 <sup>th</sup> June 2026	09:00 - 16:00	10:00 - 16:00
Dates - Breakdown	Hall Access Times	Contractor & Exhibitor Access Information
Thursday, 18 <sup>th</sup> June 2026	16:00 - 22:00	Breakdown commences once all visitors have left the halls. All Shell Scheme exhibits must be clear by 22:00.  Small vehicles (cars, vans) will be permitted to access loading area between 16:00 – 18:00.  Larger vehicles will be permitted to access load area after 18:00.
Friday, 19 <sup>th</sup> June 2026	08:00 - 16:00	Space Only breakdown continues. All contractors and exhibits to be clear of halls by 16:00.

**Exhibitors and contractors must ensure their stand build can be completed and dismantled to the above timetable.**

All stand construction must be fully completed by 22:00 on Monday, 15<sup>th</sup> June 2026. Late-night work will only be permitted in exceptional circumstances, subject to prior approval from the Health and Safety team. Additional costs may apply for services such as extra lighting, traffic marshals, security, and Health & Safety personnel.

**Exhibitors and contractors must finish decorating their stands by 11:00 on Tuesday, 16<sup>th</sup> June 2026. No work can be done beyond this time.**

On Tuesday, 16<sup>th</sup> June 2026, only hand-carried items will be allowed in the exhibition halls. The use of trolleys, pump trucks, or other equipment will not be permitted, and no waste materials or rubbish should be left in the halls during this time. All empty containers must be removed and stored prior to this deadline.

All exhibit spaces in the halls must be cleared by exhibitors and contractors by 16:00 on Friday, 19<sup>th</sup> June 2026.

Exhibitors are reminded not to leave materials or personal items unattended during build-up or breakdown periods. The organisers accept no liability for any unattended items during or after these times. Any equipment or materials left behind will be removed at the exhibitor's or contractor's expense.

## KEY INFORMATION

### 1. Important Deadlines

Please refer to the Important Deadlines on page 6. Note that prices **will increase significantly** after these deadlines have passed.

### 2. Electrical Power Supply

Electrical power supply is **not** included for shell scheme and space-only stands. It **must be ordered** separately by the exhibitor or contractor. Visit the [Gielissen Exhibitor Webshop](#) to order services.

### 3. Traffic Management

A traffic management system will be in place to manage vehicle loading and unloading during the build-up and breakdown periods. Please refer to page 7 for contact details and page 6 for the booking portal links.

### 4. Space-Only Stands

If your stand is space-only, you are required to submit the necessary documentation, including stand drawings, for assessment by Essential Events, contact details can be found on page 7. Stand construction on-site is **not permitted until approval** has been granted.

### 5. Shell Scheme Stands

Exhibitors with shell scheme stands can find details of all package inclusions on pages 27 – 29.

### 6. Insurance

Insurance is included as part of your participation fee. If you wish to upload a copy of your company's insurance certificate, you will receive a unique link from InEvexco. See page 7 contact details.

### 7. Height Restrictions

The maximum height allowed for stands is 6 meters. **Stands exceeding 4 meters in height must include structural calculations** as part of their documentation. Hall 2 contains some areas with height restrictions. It is advised to speak directly with Gielissen regarding these limitations.

**Police non-emergencies:** 0900 8844 or +31 34 357-8844

## GENERAL INFORMATION

### VENUE

**Venue Name:** Rotterdam Ahoy

**Address:** Ahoyweg 10, 3084 BA Rotterdam, Netherlands

**Event Halls:** Halls 1 and 2, 3, 4, 5, 6 and Hall 8 (RTM Stage)

### VENUE FLOORPLAN

Please click [Rotterdam Ahoy Floorplan](#) to view online map including virtual tour.

### GETTING TO THE VENUE

Rotterdam Ahoy is conveniently located, with metro and bus stops at Zuidplein just a 5-minute walk from the venue. Rotterdam The Hague Airport (RTM) is a 30-minute drive and offers direct flights from most major cities. For additional flight options, Amsterdam Airport Schiphol (AMS) is approximately 1 hour away and provides direct train connections to Rotterdam Centraal Station.

## ACCOMMODATION

If you made a hotel booking through Event Express in 2025, your reservation will remain with them as originally confirmed. For any assistance with the booking, please contact Event Express at [reservations@eventexpressuk.com](mailto:reservations@eventexpressuk.com) or call +44 1905 732 737.

For Breakbulk Europe 2026, our official accommodation partner is **HotelMap**, who offer a wider selection of hotels across Rotterdam along with preferential rates. To find nearby hotels and secure the best available rates, please visit our [official booking service here](#).

For group or individual bookings, all new reservations should now be made via HotelMap.

## BADGES AND PASSES

### Badge Requirements During the Exhibition:

Badges must be worn at all times to access the exhibition halls. Onsite badge printing will be available starting from 10:00 on Monday, 15<sup>th</sup> June 2026.

### Exhibitor Pass Allocation:

Exhibitors will receive a set allocation of passes based on their stand size or sponsorship package. Any additional passes required beyond this allocation must be purchased.

### Badge Use Policy:

For security and health and safety reasons, exhibitor badges are strictly for use by staff working on your stand. These badges must not be shared or provided to visitors or other individuals.

### Registration for Show Floor Access:

Only individuals who require access to the show floor during the exhibition days need to register for a badge.

### Build-Up and Breakdown Periods:

During these periods, contractors and stand builders will be issued coloured wristbands by security personnel upon confirmation of their stand details. These wristbands will serve as access credentials, and contractors/stand builders are not required to register for a badge.

## LEAD RETRIEVAL

Visit Connect is the official lead retrieval tool for Breakbulk Europe 2026. It allows exhibitors to scan and capture visitor details directly from their smart device, enabling quick and efficient follow-up after the event.

### Key features include:

- Scan visitor badges to capture full lead details
- Add notes, voice memos, or photos to each lead
- All leads from your team sync centrally within your Visit Connect account

Lead Capture Licences are available for either single-device use or unlimited devices for the duration of the event. You can purchase the Lead Capture Licence option that suits your stand by [clicking here](#).

For support, please contact [visitconnect@ges.com](mailto:visitconnect@ges.com).

## ORGANISERS OFFICE

If you require assistance from show management onsite, please visit the organisers office located in the plaza near Hall 1, next to the service desk. Office will open during build-up, event days and breakdown periods of the exhibition.

## PROMOTIONAL MATERIAL

Please ensure that all promotional materials planned for use at the exhibition are appropriate and sensitive in content. If you have any concerns or uncertainties regarding the suitability of your materials, we encourage you to contact the marketing team for guidance. They will be happy to assist as needed.

## PUBLIC RELATIONS AND SOCIAL MEDIA

Breakbulk would like to support all PR initiatives and are able to share your press releases on our website (subject to Editorial Director's approval). Contact Leslie Meredith on [Leslie.Meredith@breakbulk.com](mailto:Leslie.Meredith@breakbulk.com).

To promote your participation at Breakbulk Europe please use the following handles and hashtags:

- YouTube: [www.youtube.com/channel/UCKN2EemicqYNnbAM8r1VuCQ/videos](https://www.youtube.com/channel/UCKN2EemicqYNnbAM8r1VuCQ/videos)
- LinkedIn: [www.linkedin.com/showcase/breakbulk-events-&-media/](https://www.linkedin.com/showcase/breakbulk-events-&-media/)
- X (formerly Twitter): [www.twitter.com/Break\\_Bulk](https://www.twitter.com/Break_Bulk)
- Instagram: [www.instagram.com/break\\_bulk/](https://www.instagram.com/break_bulk/)
- Hashtag: #BBEU26

## REGISTRATION

Information on registering and the exhibitor registration link will be released shortly. Emails will be sent from [no-reply@registration.breakbulk.com](mailto:no-reply@registration.breakbulk.com).

**Please ensure you whitelist this email address to avoid any email going into your spam/junk folder.**

## SECURITY

Breakbulk Europe 2026 provides adequate security for the facility during build-up, event days and breakdown. Please note you are responsible for insuring your own goods whilst they are onsite at Breakbulk Europe 2026.

Below are some points to follow to ensure the safety of exhibitors' items:

- Exhibitor staff is responsible for the company's security at the exhibition.
- Do not leave any cash, handbags, valuables, laptops, etc. in unlocked drawers, cupboards or in your exhibit space, especially overnight.
- Laptops or mobile phones should not be left unattended at any time.
- Please note that build up and breakdown days are high-risk periods when items are to be stolen.
- Make sure you arrive prior to the official opening time and do not leave your exhibitor space before the hall is clear of visitors.
- Should you have small valuables that you wish to leave on your exhibit space, you are advised to arrange lockable cabinets or other safe storage areas.
- A stand security service must be ordered through [Gielissen Exhibitor Webshop](#).

## DELIVERIES AND SHIPPING

Shipments can be made to DSV Warehouse ahead of the show or direct to the exhibition at Ahoy. Below gives further information on sending via these two options:

**Advance Warehouse - Deliveries can be accepted until Wednesday, 10<sup>th</sup> June 2026.** After the deadline a late arrival surcharge will apply. DSV will direct any shipments from warehouse to your stand before the show commences.

Address:

<EXHIBITOR/SENDER COMPANY NAME>  
<EXHIBITOR STAND NUMBER>  
Breakbulk Europe 2026  
c/o DSV F&E  
Ankerweg 18, Door 103  
1041 AT Amsterdam, Netherlands

**Onsite Deliveries to Ahoy - Deliveries can be accepted from Thursday, 11<sup>th</sup> June to Monday, 15<sup>th</sup> June 2026**

Address:

<EXHIBITOR/SENDER COMPANY NAME>  
<EXHIBITOR STAND NUMBER>  
Breakbulk Europe 2026  
c/o DSV Office Ahoy Rotterdam, Fairs, Events and Special Logistics  
Ahoyweg 10 Hal 6 (Warehouse)  
3084 BA Rotterdam, Netherlands

Please ensure to list as much information as possible and commodity description should include exhibition goods for Breakbulk Europe 2026, Rotterdam.

**Important:** Please refrain from using courier companies when sending your goods to the venue. The Organisers cannot be held responsible for any goods held up at customs due to the use of alternative shipment company. **Hyve Group/Rotterdam Ahoy/Gielissen cannot receive any deliveries on behalf of exhibitors.**

## FORKLIFTS

Any large items which may need to be moved or repositioned will require forklift assistance. Please contact DSV using the details provided on page 7 to arrange a forklift.

## FREIGHT SERVICES

Exhibitors planning to transport their cargo through an international courier are advised to use the services of our official contractor DSV to avoid any delays at customs. The organisers are not responsible for any goods held up at customs due to the use of alternative shipment company.

If you are intending to have cargo delivered to your stand it is important that you arrange for a representative of your company to be at your stand to receive them. If you are not able to arrange, all deliveries need to be correctly addressed to DSV to be delivered onsite to your stand.

**Please note the organiser, its contractors or Rotterdam Ahoy cannot accept delivery of any goods nor cannot accept responsibility for any goods delivered to unmanned stands.**

If you have cargo delivered to your stand, or you are using a separate courier to make a delivery, we strongly advise to send them by **recorded delivery or registered post**. Any such items should then be signed for personally by exhibitors.

If you are using our preferred supplier for freight, please arrange to have your packages addressed as follows and DSV will direct deliveries to your stand. Please ensure to list as much information as possible and commodity description should include Exhibition goods for Breakbulk Europe 2026, Rotterdam.

Address:

<EXHIBITOR/SENDER COMPANY NAME>  
<EXHIBITOR STAND NUMBER>  
Breakbulk Europe 2026  
c/o DSV F&E  
Ankerweg 18, Door 103  
1041 AT Amsterdam, Netherlands

**Please remember that any re-stocking done during the show open hours will be strictly limited to hand carry good only 1 hour before the event opens and 1 hour after the show closes.** We recommend that you arrange for a representative to stay with your materials or that you hire security services to safeguard your materials if they are highly valuable.

**Any containers or heavy exhibits should to be delivered to DSV by Wednesday, 10<sup>th</sup> June 2026 before build-up commences on Friday.**

## STORAGE OF EXHIBITOR CASES/TRAILERS/CONTAINERS

This section applies to **larger items** that cannot remain inside the halls at any time, such as **empty packing cases, crates, pallets, trailers, or containers**.

- The venue and organisers **do not provide or hold storage** for these items.
- All cases, crates, pallets, trailers, and containers **must be removed from the hall after unloading** and stored externally through DSV.
- DSV will manage collection from your stand, secure off-hall storage, and return of your items at the agreed time during breakdown.
- Exhibitors planning to bring trailers or containers must **pre-book storage and handling** with DSV in advance.

**To arrange storage:** Contact [DSV](#) (details on page 7).

## PACKING CASES AND ONSITE STORAGE

Exhibitors **must not store any items outside their stand space** at any time during build-up, open days, or breakdown. This includes empty packing cases, boxes, excess materials, tools, and spare stock.

- **The venue and organisers do not provide onsite storage.** No items may be stored behind or inside stand structures, in service areas, gangways, or anywhere in the halls.
- **Empty or full items must not be left in the halls.** All off-stand storage must be arranged in advance.
- If you require storage during the event, please arrange **onsite storage services with DSV**, who can collect items from your stand, store them securely, and return them at a scheduled time.

**To arrange storage:** Contact [DSV](#) (details on page 7).

*Note: Exhibitors may include built-in storage units within their own stand space; however, any storage outside the stand footprint is strictly prohibited.*

## TRAFFIC MANAGEMENT SYSTEM

### Loading and Unloading during Build-up and Breakdown:

All vehicles loading/unloading for build-up and breakdown are required to follow the traffic management system. The vehicle registration system will require vehicles to book a timeslot via DSV on the following link: [Vehicle Registration System](#)

Please note all vehicles including vans and cars you are required to book a timeslot if you are unloading via traffic management system. If you are using the car park and unloading, booking a time slot is not required.

For any assistance, please contact the traffic enquiries [email](#) and telephone number listed on page 7.

## PARKING

Exhibitors and visitors can purchase parking tickets for Rotterdam Ahoy **in advance** via Ticketmaster. Tickets will be emailed approximately one week before the event and are valid from the first exhibition day. They can be used in parking areas P1/P2/P3, with the possibility of being redirected to P4 or P6 by traffic controllers.

### Buying Parking Tickets

- Parking tickets can be ordered via **Ticketmaster** up until one week before the event.
- Within the final week, parking tickets can **no longer** be bought through Ticketmaster. They must instead be purchased **onsite at Rotterdam Ahoy** on arrival.

### How to Use Your Parking Ticket

- Drive to any Ahoy parking barrier (front or back entrance).
- Scan the ticket at the payment terminal (increase phone brightness if scanning digitally).
- Your license plate will be registered automatically.
- On exit, the barrier will open using **license plate recognition**.
  - If it doesn't, speak to a parking attendant or press the intercom (hold for 3 seconds).

Parking permit for 3 days: **€58,50** including VAT – [Click here for ticket](#)

Parking ticket for 1 day: **€19,50** per day including VAT:

- Tuesday, 16<sup>th</sup> June – [Click here for ticket](#)
- Wednesday, 17<sup>th</sup> June – [Click here for ticket](#)
- Thursday, 18<sup>th</sup> June – [Click here for ticket](#)

### Vehicle Restrictions

Parking tickets are not valid for:

- box trucks
- vans exceeding one normal parking space
- trucks or trailers

Larger vehicles must use external truck-parking facilities in Rotterdam. For more information, visit: [www.portofrotterdam.com](http://www.portofrotterdam.com).

### Support

For parking questions or assistance, contact the Ahoy Mobility Department: [parking@ahoy.nl](mailto:parking@ahoy.nl)

If a parking ticket is not working, email on the same day so the venue can assist.

## VENUE FACILITIES AND SERVICES A-Z

### ACCESSIBILITY

Rotterdam Ahoy provides a range of facilities to ensure the venue is accessible for visitors with disabilities. All exhibition halls are located on ground level, making access straightforward for wheelchair users and those with limited mobility.

There is lift access throughout the venue, providing step-free movement between all public areas. Accessible toilet facilities are available in the foyers of each hall and are fitted with alarms for added safety.

For arrivals, a taxi and disabled drop-off area is located directly outside the main entrance. Dedicated disabled parking spaces are also available close to the entrance (parking charges apply).

### AIR CONDITIONING

All halls are air-conditioned. The systems are controlled automatically by sensors which measure temperature, humidity, atmospheric pressure, and dust content. In addition, there are convectors in the halls and foyers to assist the heating process.

### AUDIO VISUAL EQUIPMENT

Orders for audio visual services can be made through [Gielissen Exhibitor Webshop](#) and early bird deadline is **Wednesday, 15<sup>th</sup> April 2026**.

### BALLOONS / INFLATABLES

Exhibitors using helium balloons must have the balloons properly secured to their stand. There will be a charge for the removal of balloons from the roof and for any damages caused to the ventilation system. Balloons must be positioned at a height of no more than 5 metres from the hall floor to the top of the balloon and must be within their stand areas. Helium gas cylinders must be removed from the hall once the balloons have been filled. The wrapping of the balloon must be made of fireproof material.

### BANKING / EXCHANGE BUREAU

ATM machines are available at Zuidplein Shopping Center (Winkelcentrum Zuidplein), located directly across the road from the Rotterdam Ahoy.

### CATERING

Rotterdam Ahoy offers a full stand-catering service including drinks, lunches, snacks and equipment rental. Orders can be placed in advance of the event via the [Team Ahoy Catering Webshop](#). Please note the catering webshop is **event-based**, not exhibitor-based, all exhibitors must create a **new account**, even if they have exhibited previously. Additional orders can also be made onsite or by phone during event days.

If you wish to bring **external or own catering**, you must request approval from Ahoy Catering by **Tuesday, 19<sup>th</sup> May 2026**. Please note that a **25% buy-out fee** will apply.

Full details, deadlines and conditions (including delivery times, changes/cancellations and payment procedures) can be found in the [Ahoy Stand Catering General Information document](#).

**Important:** Alcohol may only be consumed during **event open days**. It is strictly **forbidden during build-up and breakdown**, and anyone under the influence of alcohol or prohibited substances will be removed from site.

### TAILOR-MADE CATERING

Ahoy Catering can provide **custom catering** for items not available on the webshop. Requests for tailor-made catering must be submitted by **Tuesday, 19<sup>th</sup> May 2026**.

For any questions or specific requirements ahead of the event, please contact the Team Ahoy Catering team at [cateringsales@ahoy.nl](mailto:cateringsales@ahoy.nl).

## CLEANING AND WASTE DISPOSAL

Rotterdam Ahoy is committed to reducing environmental impact through waste minimisation and high-quality recycling. To support these sustainability goals, waste removal is mandatory for all Space Only exhibitors.

### Mandatory Waste Declaration

All Space Only exhibitors must complete a [Waste Declaration form](#) confirming either:

- You will order the Waste Removal Service via the [Gielissen Webshop](#), or
- You will manage your own waste

Completion of [this declaration](#) is **compulsory**.

All Space Only exhibitors must choose one of the following options:

### Option 1: Waste Removal Service

Gielissen offers a **Waste Removal Service** for a fixed fee of **€355.00 (excl. VAT)**.

A specialist team will collect waste directly from your stand at regular intervals during the official build-up and dismantling periods, ensuring correct waste separation and recycling in line with Rotterdam Ahoy's sustainability requirements.

### Option 2: Manage Your Own Waste

If you choose not to order the service, you must:

- Arrange **your own compliant waste removal**.
- Keep your stand area **clear throughout build-up**.
- Leave your stand space **completely empty after breakdown**.

### Onsite Inspections & Charges

- After dismantling, you must inspect and confirm your stand space is clean.
- Failure to do so or leaving waste onsite will result in a charge of **€50.00/sqm (excl. VAT)**.
- Leaving behind full stand structures or large materials is strictly prohibited and will incur a minimum fine of **€250.00 per cubic meter**.
- Complete stand removal can be arranged through Gielissen if required by contacting [breakbulk@gielissen.com](mailto:breakbulk@gielissen.com).

**Please note:** Due to tightened recycling regulations and to ensure proper waste separation, **waste containers will not be available to order** during build-up or dismantling.

Hazardous materials such as **oils, paints, solvents and emulsions** must **not** be discharged into the sewage system. These items must be disposed of following the correct procedures and in accordance with venue regulations.

## CLOAKROOM FACILITIES

The cloakroom is located in the main entrance foyer, it will be open the same time as event days and times. Items cost €2,50 per coat and €5,00 per bag/suitcase (subject to change). **A reminder that Ahoy is a cashless venue.**

## COMPRESSED AIR

Use of compressed gases will only be permitted where essential, only by exception and these must be registered as a special risk. A certificate of installation by a Gas Safe Register registered fitter (or equivalent) is required for LPG installations.

When compressed gas cylinders are being used or handled, the accident prevention regulations must be complied with. Toxic gases must not be used. Before any system involving compressed gas, cylinders are put into operation, it must be checked beforehand by an expert in accordance with the technical regulations, in order to ensure that the system is in a satisfactory condition. When such systems are used, Rotterdam Ahoy's Technical Management must be informed in advance. To order go to the [Gielissen Exhibitor Webshop](#) and early bird deadline is **Wednesday, 15<sup>th</sup> April 2026**.

## DILAPIDATIONS

### Responsibility for Damages:

Exhibitors are responsible for covering the costs of repairing or replacing any damage to the premises caused by themselves, their agents, contractors, sub-contractors, or anyone employed or working on their behalf. Any exhibitor found causing damage to walls, carpets, or any structure within the Rotterdam Ahoy property will be charged the full replacement value of the damaged item(s).

### Prohibited Attachments and Alterations:

No attachments, fittings, or alterations may be made to the interior or exterior walls, floors, ceilings, or pillars of the building. This includes any equipment or devices affixed to or suspended from the building's structure, as well as any action that could damage surfaces or structures within the venue.

### Stand Decoration Restrictions:

Rotterdam Ahoy acknowledges that exhibitors may need to decorate their stands through activities such as painting, welding, angle grinding, timber cutting, or wallpapering. However, these activities are strictly prohibited inside the exhibition halls. A designated area in the marshalling yard will be provided for such purposes.

## FOOD SAFETY

Details of proposed preparation, cooking and dispensing of food from stands, must be discussed with the venue, Rotterdam Ahoy, during the early planning stages of the event. The venues approval is then required in writing for such activities.

## FURNITURE, PLANTS AND DÉCOR

Gielissen offers a wide selection of furniture, plants and décor, please go to [Gielissen Exhibitor Webshop](#) for available options and to order any items. Early Bird Deadline is **Wednesday, 15<sup>th</sup> April 2026**.

All stands with food preparation areas, hand washing facility with clean water and drainage is required ideally not more than 3m away. Where stands are preparing food, an additional sink must be provided for washing food and ideally a separate sink for washing dishes. For small concessions serving hot drinks and snacks no sink is required but the provision and use of sanitising hand-wipes must be employed.

## HEIGHT RESTRICTIONS AND FLOOR LOADING AREAS

The following table shows maximum construction heights in all halls. Please note, where there are no height restrictions **the maximum height is 6m**. Any stand built over 4m in height will require structural calculations.

The organiser does not provide partition walls and each stand must build freestanding partition walls between their own and adjoining stands. These must be to a minimum height of 2.5m. Adjoining walls on the side connected to a neighbouring stand must be finished in a hard-plain white surface.

Where partition walls are constructed over 2.5m in height, it is the responsibility of the exhibitor constructing the wall to dress the rear of the partition wall down to a height of 2.5m in solid hard white walling. Logos and branding are not permitted on the rear face of partition walls when these walls overlook neighbouring stands.

Location	Length	Width	Surface	Height	Transportation Door	Max. Floor Load	Max. Truss Load
Hall 1	142 m	70 m	10,000 m <sup>2</sup> / 18 m <sup>2</sup>	11.9 m	H=5.6 m / B=5.6 m	1250/2500 kg/m <sup>2</sup>	6000 kg

## RTM Stage (Hall 8) – KEY INFORMATION

Hall 8 has different structural specifications from Halls 1–6. Exhibitors with stands or rigging in this hall should note the following:

Location	Length	Width	Surface	Height	Max. Floor Load	Max. Truss / Rigging Load
Hall 8	50 m	72.5 m	3,435 m <sup>2</sup>	Max hall height: 26 m Max rigging height: 21 m	1,000 kg/m <sup>2</sup>	6 rafters @ 12,000 kg each 8 stage rafters @ 24,000 kg each

## INTERNET / WIFI

For event critical services such as demonstrations or presentations use, we always advise a hard-wired internet service is required. This will ensure that there is no interruption to internet connectivity, as would be the risk with a wireless internet service. Wireless and wired internet services for exhibitors must be ordered via [Gielissen Exhibitor Webshop](#) and Early Bird Deadline is **Wednesday, 15<sup>th</sup> April 2026**.

Please note: Free Wi-Fi will be available at Breakbulk Europe however it is only for basic usage and such web browsing and checking emails. If you require a higher speed internet connection for your stand, it is advised order internet via the [Gielissen Exhibitor Webshop](#).

## LATE WORKING SYSTEM

Exhibitors and contractors should plan to ensure that late working is not required. It may be allowed in exceptional circumstances by prior arrangement with the organiser. Your attention is drawn to the EU Working Time Directive (93/104/EC) which limits hours of work for staff. It is recommended you speak with organisers office for details.

## PA SYSTEM

The organiser will have access to a PA System inside the venue. This is only to be used for emergency and show announcements.

## PHOTOGRAPHY & FILMING

Official photographers and videographers will be present throughout Breakbulk, capturing activities on the program stages, within the exhibition hall, and during social functions. All photographs and video footage taken during the event may be used by the Breakbulk media team for promotional purposes across the exhibition hall and feature areas.

## RIGGING

### Authorised Rigging Provider:

Rigging from the roof is exclusively permitted for Gielissen, their contractors and venue appointed rigging companies. All rigging must be conducted by qualified riggers and carried out under appropriate supervision, adhering to strict risk assessment procedures and use of required PPE and height safety guidelines.

### Stand Plans and Approval:

Prior to placing rigging orders, exhibitors must submit stand plans, including rigging details and dimensions to Essential Events for approval. This is mandatory for all rigged signage, overhead lighting, or fittings intended to be suspended from the ceiling within the exhibit space. These elements must also be included in the stand plan approval application for space-only exhibitors.

### Rigging Regulations:

Rigging is only permitted directly above your stand and must comply with the maximum height regulations.

All rigging must be set back by at least 1 meter from the stand perimeter on all walled or open sides.

Suspensions are not guaranteed for stands without a suspension point directly above them. In such cases, truss fixtures may need to be installed on the ceiling, a complex process that may incur significant costs.

**Height Restrictions:** In hall 2 contains some areas of the hall that has restricted height. It is advised to speak with Gielissen directly regarding these restrictions.

### Rigging Orders and Deadlines:

To place a rigging order, visit the [Gielissen Exhibitor Webshop](#). The Early Bird Deadline is **Wednesday, 15<sup>th</sup> April 2026**.

## TEMPORARY STAFF

You can book stand staff such as hosts or hostesses, labour and stand security please book via [Gielissen Exhibitor Webshop](#).

## HEALTH AND SAFETY

This section is designed to give you sufficient guidance on Health and Safety. Guidance, however, can only go so far and you have a legal duty to ensure that your teams, contractors and partners follow Health and Safety laws and regulations. Failing to do so can lead to prosecution and other legal sanctions. If you need further assistance or information, do not hesitate to contact [Breakbulk Support](#).

**Policy Statement** - Breakbulk Events & Media recognises that our exhibitors rely on us to provide a trading environment on the exhibition floor which is safe and without risks to health. We also recognise that running a public event places a special responsibility on Breakbulk Events & Media and extends our duty of care not only to our staff but to exhibitors, contractors, venue staff and visitors. The organiser is ultimately responsible for Health and Safety at the show.

To ensure that all health and safety obligations are met, the organisers will:

- Allocate sufficient resources to meet Health and Safety objectives.
- Provide adequate control of Health and Safety risks arising from work activities.
- Consult with the venue, exhibitors and contractors on matters affecting health and safety.
- Provide relevant Health and Safety information to employees and others.
- Ensure all employees are competent to do their tasks particularly regarding Health and Safety training.
- Ensure so far as is reasonable that the contractors we engage for the show are competent.
- To far as is reasonably practicable prevent accidents and cases of work-related ill-health and maintain safe and healthy working conditions.

## ACCIDENTS

All Accidents and near misses should be formally logged with witness statements and accompanied by video or photographs taken. All reports may be used for future investigation, therefore as much detail should be recorded. All documents are to be treated with the upmost confidentiality and as such should be stored in accordance with data protection laws and regulations. If an incident occurs onsite, please either speak with a Health and Safety team member or notify staff member in the operations team who will inform Health and Safety team.

## ANTI-SLAVERY & HUMAN TRAFFICKING

Hyve Group is committed to the highest ethical standards and to ensuring that the human rights of all individuals engaging with Breakbulk Europe are respected and protected, therefore respecting the human rights of all employees, contractors and suppliers. It is a requirement of your attendance on site that you comply with all applicable human rights and employment laws, as well as the UK Modern Slavery Act 2015.

Forced, involuntary or child labour, slavery and human trafficking are strictly prohibited. Work must be voluntary, with freedom to leave employment in line with the law. Workers have the right to freedom of association and collective bargaining, must be treated fairly and equally, and must not be subject to discrimination, harassment or abuse of any kind.

## CHILDREN

Under no circumstances children under the age of 16 years are allowed into the exhibition halls during the build-up, show open days or breakdown.

## DRINK AND DRUGS

Drinking of alcohol onsite during the build-up and breakdown phase is strictly prohibited. Anyone under the influence of alcohol or forbidden substances will be removed from site immediately. Use of drugs are not permitted anywhere in the venue.

## ELECTRICAL WIRING AND INSTALLATION

Electrical fittings must be installed competent contractor. Any electrical equipment brought into the venue premises must comply with the Electrical Installation Regulations and the Electrical Machinery Regulations. A Certificate of

Compliance (COC) is to be produced for any electrical connections made to the Rotterdam venue electrical distribution. Such certificates can only be issued by a registered electrician.

Should this not be the case, equipment will be removed immediately from the premises at the exhibitor's expense and charges for any damage caused by faulty equipment costs will be charged to the exhibitor.

In Europe, exhibitors and contractors must comply with the venue's electrical regulations. All exhibitors and contractors must comply with local laws and venue regulations.

- All work must be carried out by competent and qualified electricians and all temporary installations must be protected by an RCD and inspected before power is supplied to the stand.
- During the build-up and breakdown power must only be taken from the temporary supplies provided by the official electrical contractor and no cleaners or other hall sockets should be use under any circumstance.
- There should be sufficient, correctly installed and rated power sockets to preclude the use of extension leads and long trailing flexes. If essential, extension leads must be correctly fused and limited to one per socket. Multi-sockets must not be used.

## EVACUATIONS PLANS AND PROCEDURES

In an event of an emergency the following services will be provided:

- Emergency lighting to require lux level
- Essential ventilation (smoke venting)
- Automatic fire detection system
- Aspiration system
- Evacuation PA system
- Sprinkler systems
- Fully trained Emergency Coordinator and Team
- Trained Fire Marshalls
- Pressurisation of fire escape stairwells
- Kitchen Ansul Systems
- Fixed Fire Fighting equipment

In case of an emergency, all emergency doors will automatically open. Exhibitors/Contractor/Visitor will be directed to the assembly points situated on the front square in image below.

*The Rotterdam Ahoy reserves the right to adjust emergency services according to the event. Plans are available on request.*

## FIRE PRECAUTIONS AND PROCEDURES

Articles of a combustible nature such as fabric, paper items, banners, items made of wood pallets; hessian, thatch and straw are regarded as major fire hazards and will be required to provide a Fire-Retardant Certificate, before the start of the event. When material draping is used as part of a display, please ensure the draping does not come into contact with electrical wiring, fittings and/or globes and drops no lower than 5cm above the carpeted floor.

The use of halogen lights will not be approved as they pose a fire hazard. Ensure that all light displays have low wattage or LED. We advise that no halogen or fluorescent lighting should be used. Only LED type light fittings, fixture with a suitable method of installation/fixing should be used. The wattage is dependent on the space only design and layouts, range between 3 to 50watts. Design loads will need to be clarified with the official electrical event contractor.

Fire escapes are located throughout the venue with signage. Event organisers will ensure that signage nor the exits door are obstructed in any way.

## FIRE SAFETY

There are strict rules governing what materials can be used to build stands and these will be covered by the venue's regulations. Exhibitors and contractors must ensure that they are followed. You are not permitted to build your stand with anything which is flammable or non-flame resistant unless it has been treated. Combustible waste must be safely disposed of and boxes and cargo must not be stored on the stand.

## FIRST AID

First aid cover is provided by the organisers and the nearest first aid office to the show halls is located in the plaza next to the cloakroom. In an emergency, please contact the nearest security steward, Healthy and Safety officer or speak to one of the Hyve team member for assistance.

## INSURANCE PUBLIC LIABILITY

Exhibitors are responsible for obtaining PLI insurance protection for their exhibits, property and personnel against all risks as stated in the General Conditions. Equipment should be insured both in transit and on location at the exhibition site for the entire period of the exhibition. You would have been sent your unique link to upload the certificate to your portal. If you are able to provide your own PLI, then you will have to upload a copy of the certificate. Please contact [Breakbulk Support](#) if you need any more assistance.

All copies of insurance policies must be submitted before deadline the first day of build-up.

The Exhibitor is fully responsible for obtaining Public Liability Insurance to value of **£2,000,000**.

- The cost of the policy is €195.00.
- This insurance is available to exhibiting companies only; contractors must obtain their own insurance to the required level of cover.

### Insurance cover should include:

- PLI (Public Liability Insurance to the value of £2,000,000)
- Personal Injury
- Third Party Claims
- Expenses incurred and/or losses of any kind, including losses resulting from the abandonment or postponement of the exhibition
- Medical expenses and baggage cover
- Value of the stand, including the fittings

A full specimen wording, showing the terms, conditions and exceptions of the cover, is available from InEvexco Ltd. It is the Customer's responsibility to read the policy wording as some exclusions apply. This service is provided on a non-advised basis and it is the Customer's responsibility to make sure that the minimum limits are sufficient for its needs.

The standard limits provided by the Insurance Participation Fee are: Cover Headings Standard Limits Brief Summary of the Cover Exhibitor Expenses GBP 20,000 Loss of irrecoverable expenses sustained as a result of cancellation, abandonment, curtailment, postponement or removal to alternative premises; inability to open or keep open the Customer's stand/space due to damage to Exhibitor Property at the Venue, in transit to the Venue or damage to the Venue itself; late or non-arrival of Exhibits or of the Customer's staff/representatives; failure to vacate the Venue within the contracted time; reasonable additional costs and expenses incurred in avoiding or diminishing a loss; for reasons beyond the Customer's control.

## LADDERS

Ladders can be used when it is not possible to use a working platform, or the activity is assessed to be low risk. Ladders must be used in accordance with manufacturer's instructions at all times. Additionally, the following guidelines must be followed:

- Ladders must have 'industrial' rating.
- Ladders for work over 4m are not permitted.
- Leaning ladders must be placed at the correct angle.
- Ladders should only be used on level ground and must be secure e.g. suitably tied or, as a last resort, footed
- The top treads or steps must not be used as a platform for work.
- Users should face the ladder at all times whilst climbing or dismounting.
- Stepladders should not be used sideways-on where sideways loads are applied.
- Only one person should climb or work from a ladder or a stepladder.
- Users should not overreach.
- Steps and ladders should be checked for suitability and defects each time they are used.
- Should be correctly footed when in use at all times.
- Should be set on level ground.
- If a change in ladder location is required operatives are to dismount to move and not 'walk' the ladder whilst mounted.

## METHOD STATEMENTS

A method statement is a critical document used during safety inductions, providing clear and specific instructions on how to safely perform a work-related task or operate a piece of equipment.

When preparing your method statement, you must:

- Identify and outline all potential hazards associated with the task or process.
- Provide detailed guidance on how to complete the task safely, including the steps, procedures, and safety measures required.

A well-prepared method statement ensures that all tasks are carried out in compliance with health and safety standards, minimizing risks to personnel and property.

**Space Only exhibitors are required to submit the below documentation.**

Please submit all forms with stand designs to [Essential Events](#) for assessment.

**Deadline Date: Monday, 27<sup>th</sup> April 2026.**

- [Exhibitor Space Only Contractor Undertaking Form](#)
- [Risk Assessment](#)
- [Method Statement](#)

## NAKED OR OPEN FLAMES

The use of open fire or naked lights in the halls is prohibited. **Naked (open) flames, candles and barbeques are not permitted.** The use of open fire or naked lights on the open-air site is only allowed after the application and permission by Rotterdam Ahoy's Technical Management. The legally regulation of fire protection and the restrictions of the Fire Department Rotterdam must be observed. The burning of packing material, waste etc. in the halls or on the open-air site is strictly prohibited.

## NOISE LEVELS

Maintain safe noise levels below 60dbA during build up and breakdown period. Where noise levels exceed 60dbA, you will be asked to reduce noise levels or if the organizers receive complaints from surrounding exhibitors. **The organisers will make the final decision.**

## PPE

All exhibitors and contractors must always wear appropriate Personal Protective Equipment (PPE) during build up and breakdown periods. The venue and the organisers will not allow the work to begin without adequate PPE.

**For details of the required PPE onsite refer to [Rotterdam Ahoy Safety Instructions](#).** The minimum requirements include, but are not limited to, those listed below; however, the requirements vary according to the task:

- Correct Shoes: During the build and breakdown periods, the use of heels, sandals or open shoes is not permitted. **Safety shoes must be worn during build and breakdown periods.**
- High visibility vests are highly recommended during the build and breakdown periods in the outside loading bay areas.
- Persons working in areas close to works at heights must wear suitable hard hats.
- Appropriate height ladders must be used. Please ensure your contractor brings the correct working at height equipment.
- For more detail on required equipment please see the Working at Height section. See pages 22-23.

## REPORTING OCCUPATIONAL INJURIES AND DISEASES

Workers must notify organisers office and their employers of an accident immediately. A report must be carried out onsite by the organisers Health and Safety officer.

## RISK ASSESSMENTS

Hyve Group has carried out suitable and sufficient assessment of the risks associated with this event, details of which can be obtained from the organiser's office. General risks associated with any exhibition are as follows:

- Trip hazards
- Multiple contractors working in a single workplace
- Fall from working at heights and working on a live edge
- Objects falling from height or loads falling from vehicles
- Impact injury from moving vehicles
- Structural collapse of seating or an exhibition stand
- Outbreak of legionnaires disease from a water feature
- Food poisoning incident from temporary catering outlet
- Fire
- Major incident and civil emergency
- Excessive working hours.

This is an overview and by no means a comprehensive account of the risks involved at this event. It is the absolute duty of all parties to ensure that under the EU Framework Directive (89/391/EEC) and other legislation suitable that sufficient risk assessments are conducted on all significant risks. Legislation also requires that risks should be mitigated with a view to achieving maximum reduction in the level of risk within the bounds of what is reasonably practicable. In general terms, emphasis should always be placed on eliminating or reducing risk at source. It must be remembered that personal protective equipment is usually a control of last resort.

A risk assessment is an important step in protecting your workers and your business, as well as complying with the law. It helps you focus on the risks that really matter in your workplace – the ones with the potential to cause harm.

You are required to protect people as far as is reasonably practicable. It is simply a careful examination of what could cause harm to people, so that you can weigh-up whether you have taken enough precautions or should do more to prevent harm. Workers and others have a right to be protected from harm caused by a failure to take reasonable control measures.

**Space Only exhibitors are required to submit the below documentation.**

Please submit all forms with stand designs to [Essential Events](#) for assessment. **Deadline Date: Monday, 27<sup>th</sup> April 2026.**

- [Exhibitor Space Only Contractor Undertaking Form](#)
- [Risk Assessment](#)
- [Method Statement](#)

## STROBE LIGHTING/PYROTECHNICS

No strobe light effects are permitted to be used during the event.

Smoke, smoking and pyrotechnics are not allowed in Rotterdam Ahoy. Lasers can be used always within the stand perimeter, never outside them or on hall walls or ceilings. All special effects must be treated as special risks and are subject to strict controls in accordance with a risk assessment and the appropriate legal and venue requirements. Further information can be obtained on these from the organiser.

## VEHICLES ON STANDS

All display vehicles must be reported to the organisers **at least 28 days prior to the event**. Vehicles must be positioned within the stand area and set back by a minimum of 2 meters from the stand perimeter.

Vehicles displayed on stands must:

- Be static and have their engine switched off during the open hours of the event.
- Contain only a minimum amount of fuel.
- Have a lockable fuel cap.
- Have a drip tray placed under the engine.
- Be included in the stand's risk assessment.
- Keys left with the Health and Safety manager/team.

Subject to a risk assessment, battery disconnection may be required for vehicles over ten years old.

Agreement on delivery and removal times/dates must be discussed with and approved by the Organisers. Exhibitors may be asked to leave a spare set of keys with the Organisers in case of an emergency.

Vehicles with internal-combustion engines may only be exhibited in the halls and other enclosed event areas after obtaining permission from the Organisers. The contents of the vehicle's tanks shall be reduced to the minimum level required to drive the vehicle into and out of the area and, wherever possible, the tank caps shall be locked.

Depending on the event in question and the location of the exhibit, other safety measures may be required, such as rendering fuel tanks ineffective, disconnecting batteries and/or the posting of security guards.

In the case of electrically propelled vehicles, the propulsion batteries shall be disconnected from the drive using the safety cut-off switch (main switch).

## OUTDOOR VEHICLES

All outdoor vehicle displays require prior approval from the venue. Exhibitors must provide details such as the vehicle's weight and dimensions to the operations team, who will coordinate with the venue to secure approval and determine the display's position.

## WELDING AND SIMILAR HOT WORK PERMITS

Welding work on the exhibitor's own materials is permissible only by consultation and agreement with Rotterdam Ahoy's Technical Management.

## WORKING AT HEIGHT

Contractors/Exhibitors working at height must work in accordance with the EU Working at Heights Directive (2001/45). As such, all working at heights is subject to a risk assessment.

Where no specific height restrictions apply, the maximum allowable stand height is **6 meters**. For any stands exceeding **4 meters** in height, structural calculations must be submitted for approval.

- All rigging from the ceiling is to be carried out by the official rigging contractors Gielissen or venue appointed riggers.
- All working platforms are to have a guard rail, mid rail and toe board. Tools are to be kept on lanyards so far as is reasonably practicable.
- Static and mobile access working platforms must be fit for purpose (see working platforms).
- Separate risk assessments are required for working on a live edge (before rails are in place). In such cases fall arrest equipment must always be used.

- Operatives working at height other than on a static working platform designed for that purpose (e.g. scaffold) must be clipped on.
- Operatives working at height must have suitable head protection ground access to areas in the vicinity must be controlled to prevent persons accidentally walking directly under high works.
- Ground workers in the vicinity must not work directly under high works and wear suitable head protection e.g. hard hats.

## WORKING PLATFORMS

- All Mobile Elevated Work Platforms (MEWPS) must be properly maintained.
- All working platforms are to have a guard rail, mid rail and toe board. Mobile access towers must be correctly constructed.
- Mobile access towers must be fit for purpose. Outriggers are to be used correctly with the correct height to width ratio (3.5 x shortest base width indoors and 3 x shortest base width outdoors).
- Mobile access towers may not be moved whilst in use and wheels must be locked off.
- Ladders must be footed or tied off. The use of domestic ladders and steps is strictly forbidden.

## SPACE ONLY STANDS (Custom Built Stands)

**Space Only exhibitors are required to submit the below documentation.**

Please submit all forms with stand designs to [Essential Events](#) for assessment. **Deadline Date: Monday, 27<sup>th</sup> April 2026.**

- [Exhibitor Space Only Contractor Undertaking Form](#)
- [Risk Assessment](#)
- [Method Statement](#)

**Gielissen** is our recommended stand contractor. To obtain a custom stand design, please send a request to the Account Manager Dylan van Beek on the below details:

**Email:** [Dylan.van.Beek@gielissen.nl](mailto:Dylan.van.Beek@gielissen.nl)

**Telephone:** +31 40 235 36 37

**Mobile:** +31 6 22 23 15 67

Where **Space Only** has been reserved, the organisers provide only designated floor space, your external design team can then build your stand.

### Space Only excludes:

- Shell scheme stand
- Signage
- Power cable
- DB board for electrics
- Lighting
- Furniture

Any requirements for custom/Space Only stands will need to be provided by your design team and/or yourself as the exhibitor. Its advised exhibitors must ensure their appointed stand builder quotes for a DB Board and electrical power plug, lighting plus the supply of any furniture and/or additional requirements as needed. Exhibitors will be required to submit plan drawings showing elevation, plan views and measurements so these can be approved by the organiser and the venue.

The exhibiting space provided will be a marked area on the show floor when you arrive. It is the exhibitor/contractor's responsibility to check the correct space before starting to build.

It is the responsibility of Exhibitors who have taken "**Space Only**" sites to supply, erect and decorate freestanding single clad partitioning to the periphery of their sites where they adjoin an adjacent stand. Any walls built over 2.5m must be decorated to an acceptable white colour standard on the reverse.

**Important:** Walling off any open stand side is restricted to 1/3 of each open side unless constructed in a see-through material or set back in 0.5m from the perimeter of your stand. All Stand designs need to conform to this and must be approved with Essential Events in advance.

The definitive set up of your stand must be in strict conformity with the rules and regulations of the exhibition and will be acknowledged upon receipt of your rendering/plans submission. Stands must match submitted renderings when erected on event site.

### Plan Presentation and Submission for Approval

It is compulsory that you submit your stand renderings/plans for review before **Monday, 27<sup>th</sup> April 2026**.

- Plan view, showing clearly all dimensions, walling and major exhibits
- Elevation views, showing clearly all dimensions, graphics etc.
- Structural calculations/drawings proving structural stability, weight loadings etc.
- Details of materials and fire protection

Any modifications to the stand design must be submitted for approval. Stand installations not complying with the most recent plan received by the organiser will not be authorised. The design of the stand must be such that it can be safely erected and dismantled within the time available.

Drawings should be in a recognised scale not less than 1:50. All plan calculations and documentation must be in English and should clearly state the Exhibiting Company's name, the stand number and the name and contact mobile number of the responsible contractor.

### BACK WALLS TO STANDS / NEIGHBOURING STANDS

In the event of the exhibitor's stand being higher than 2.5m in height, the exhibitor must then cover the exceeding portion of its stand walls/panels that are visible, ensuring that it looks neat and painted in white/neutral colour. Exhibitors are not allowed to apply any type of visual elements such as logos, writings or flags on the exceeding area.

The minimum aisle space applicable to all exhibitions is **3 metres**. Should any item or structure be placed or protrude into the designated aisle space, the organisers reserve the right to request its removal or to remove the item itself without any liability for loss or damage.

### COMPLEX STRUCTURES AND MULTI-STOREY STANDS

Any stands above 4m is considered a complex structure and structural calculations are required to be submitted. Stands are subject to strict venue building controls and completed stands will require a structural engineer's certificate to check loadings, foundations and the integrity of suspended items. For details please refer to information in **Working at Height** and **Space Only Stands**.

The stand must also comply with fire and other safety requirements with regards to construction materials, steps, handrails and routes of escape in accordance with the venue's regulations. In general, you are not permitted to build your stand with anything which is flammable or non-flame resistant unless it has been treated. The maximum travel distance normally allowable to the aisles is 10m.

**Rigged items:** Where any element is suspended, please see the quick guidance below on **Complex vs Non-Complex rigged structures** and the **minimum submission requirements** for complex suspended loads.

#### All Space Only Stands needs to abide by the following rules:

- No double multi-storey framework is constructed from wood, only steel used as standard
- Double decker stands where more than 50 people can occupy upper level have a second staircase to it
- Ramps have a gradient that is not too steep for use by pedestrians and wheelchairs
- Handrails anywhere are non-climbable (vertical not horizontal)
- Barriers are provided to protect exposed edges of staircases, landings, balconies and other level changes
- Decorative materials used for stand dressing are flame proofed or purchased already treated
- Artificial plants are not to be used for stand dressing apart from silk material provided they are treated
- Drapes or curtains are inherently flame proofed. Test curtains need to be available for inspection
- All floor coverings are secured and maintained so they do not cause a hazard.
- Any uninterrupted large areas of clear glazing (i.e. glass) are indicated with warning stripes/dots, etc
- Only water-based paint is used onsite

## Rigged Structures – Complex vs Non-Complex:

- **Non-Complex (examples):** fabric banners; unmodified lightweight aluminium frames; flown LED screens in standard configuration. *These are off-the-shelf products designed to be suspended and assembled strictly per the manufacturer's instructions.*
- **Complex (examples):** anything not classed as Non-Complex; modified aluminium frames (e.g., ceiling or extra suspended items added); flown LED screens with additional structure; bespoke timber/steel structures built onsite.

**Note:** No MDF or chipboard may be used in any rigging element.

## If your rigged structure is Complex, please include the following with your stand plan submission:

1. **Construction drawings**
  - Hanging-point **connection details** (all components structurally rated)
  - **Materials** being used
2. **Structural Calculation Package** (by a suitably qualified structural engineer, e.g., CEng MIStructE) including:
  - Engineer's **name, company, qualifications**
  - Confirmation of **primary structural materials**
  - **Connection/fixing details** (all structurally rated)
  - Calculations showing **dead & live loads** and load paths back to suspension/rigging points
  - **Factors of Safety** in line with relevant **Eurocodes**
  - **Total suspended weight** and **weight per hanging point**
  - **Hanging-point details & drawings**

## CONTAINERS/HEAVY EXHIBITS

Any containers or heavy exhibits should to be delivered to DSV by **Wednesday, 10<sup>th</sup> June 2026** before build-up commences on Friday.

## CONTRACTOR ACCESS

After onsite arrival, all contracted labour/stand builders will be checked and given a coloured wristband. This will be checked at the security check point to allow them to gain entrance after providing stand details. Rotterdam Ahoy staff and security will stop anyone without a wristband trying to gain access.

## FLOORCOVERINGS AND CARPET

Space Only stands can order carpet or floorcoverings through the official show contractor **Gielissen**. Shell Scheme stands have carpet included as part of their package. Carpet is installed before the first build-up day; if you have a raised floor or require a different installation time, please contact Gielissen to arrange this. Carpet colour options can be selected via the Gielissen Exhibitor Webshop.

Carpet may only be fixed using **double-sided adhesive textile strips**, which must be fully removed by the exhibitor after the event. Any carpet left onsite or not removed correctly will incur charges to the exhibitor.

To place orders, visit the [Gielissen Exhibitor Webshop](#)

**Early Bird Deadline:** Wednesday, 15<sup>th</sup> April 2026

(Please refer to the Important Deadlines section on page 6 for additional dates.)

## GANGWAYS

No part of any stand or exhibit, including fascia, signs, lighting, corner posts, etc, shall project into or over the gangway or obscure any fire or exit signs. The organisers reserve the right to remove any such items. Exhibitors and Contractors are not to leave items in the aisles. All waste other than small items must be removed by the contractors. Designated emergency aisles **must be kept clear at all times**. Lifting contractors are not to set down loads in designated emergency aisles.

The Organiser does not provide partition walls and each stand must have freestanding partition walls between their own and adjoining stands. These must be to a minimum height of 2.5m, a maximum height of 6m. Adjoining walls on the side connected to a neighbouring stand must be finished in a hard-plain white surface, **no fabric**.

Where partition walls are constructed over 2.5m in height, it is the responsibility of the exhibitor constructing the wall to dress the rear of the partition wall down to a height of 2.5m in solid hard white walling. Logos and branding are not permitted on the rear face of partition walls when these walls overlook neighbouring stands. Such walls must be finished in a hard-plain white surface, **no fabric**.

## PAINT SPRAYING REGULATIONS

No spray painting is allowed inside the building.

## PILLARS OBSTRUCTIONS ON YOUR STAND

Please check with the organiser if you have a pillar/obstruction or access to a door required on your stand to obtain the measurements. We advise you to add a 20cm margin to the measures of the pillar to avoid disappointment on-site.

Pillars may be encased on all 4 sides to a height of 3m maximum. Structure around pillar can be supported by it, but must be separated or, at the very least, insulated with soft material (felt, hardboard, sponge, etc) placed over the points of contact.

## RAISED FLOOR PLATFORMS

**We strongly recommend ordering a raised platform if your stand has water services to hide unsightly pipe work. All platform corners must have rounded corners or plastic guards to help ensure exhibitors safety.**

If your power connections are within an open space or pulled from a neighbouring stand, a raised platform with the use of a platform is **highly recommended** for any stands with water and /or electrical wiring. This will ensure no water or electrical connections will be visible in floorcoverings/carpet.

Exhibitors who use such platforms should bear in mind that:

- The maximum height allowed, measured from floor level to the top of the platform, is 10cm.
- The platform sides must be closed and neatly finished.
- Platforms should be placed within the stand perimeter.
- Platform corners must have rounded corners or plastic guards.
- All platform corners must have safety tape.

Exhibitors whose stands have raised floors are requested to ensure that their stand is accessible to the disabled, for instance, by employing sloping stand edges or by adding ramps (of sufficient width and without sharp-angled sides).

## STAND DEMOLITION

**No display material, fixtures or fittings may be removed from the exhibition before the official closing time. The organisers request that the integrity of your stand is maintained until all visitors have left the building. Please do not put visitors in danger by moving items out into the gangway at any time. Security guards have been notified to stop any exhibitors leaving the building with stock before the official start of derig period.**

## STAND LOCATION, NUMBER AND SIZE

We advise to display your stand number clearly on your stand. For stand location, number and size please email [Breakbulk Support](#) for assistance. You can find a copy of the event floorplan on the [Breakbulk Europe Website](#).

## WALLING IN ON OPEN SIDES

No more than one third of each open side is allowed to be walled in. The walling must be see-through or set back into the standby 0.5m. **If your stand is near the catering area or a lounge, no walling is allowed on the side facing this area.**

## WATER CONNECTIONS

Please note that water connections are **not available on all stand spaces**. Before finalising your stand design, please check with the Operations or Sales team to confirm whether a water duct is available at your location.

If your stand requires water but your designated space does not have direct duct access, the Operations team may liaise with neighbouring stands to explore the possibility of sharing a duct, subject to their agreement. In these cases, exhibitors must incorporate raised flooring into their stand design to cover and safely route water pipes and drainage.

## **Important: Hall 8 (RTM Stage)**

Hall 8 has **no water ducts**, meaning water connections **are not available** in this hall. Exhibitors in Hall 8 must take this into account when planning their stand design and any activities that would normally require running water.

If you require guidance or need to consider alternative solutions, please contact the **Operations team** or the official contractor **Gielissen**, who will be happy to advise on feasible options.

## **UPHOLSTERY**

All upholstered and fabric items used on your stand must be flame retardant or treated with an approved flame retardant solution. Exhibitors and contractors should ensure materials meet relevant fire safety standards.

## **SHELL SCHEME STAND**

All shell scheme stands will be built by the event official stand builder Gielissen and are made up of a unique modular aluminium system. Shell scheme stands are built to an overall height of 2.5 metre high, no materials can exceed the height limit of the shell scheme stand.

**Gielissen reserves the right to impose charges on any modifications applied to any parts of the shell scheme stand.** No alterations may be made to the shell structure or any variation to the wall treatment. Any damage to shell schemes or accessories will be charged to exhibitors.

### **Standard shell scheme stand includes:**

- Carpet
- Company name and logo (on fascia board)
- Furnishings (see 'Stand Packages and Visuals' for details)

### **Standard shell scheme stand does NOT include the following but can be ordered via [Gielissen Exhibitor Webshop](#).**

- Electricity for the lighting of a standard stand size you need at least 3KW (**Electricity is not included and is highly recommended**)
- Lighting (spot, plug socket, etc.)
- Cleaning of your stand
- Extra furniture
- Extra supplementary material (curtain, shelves, etc.)
- Additional Items and constructions
- Internet
- Floral

Please note, there is the possibility to purchase additional shell scheme panels at the exhibitor's expense, for example if you were planning a storeroom within your stand.

If you are buying additional walling, please note that walling-in on open sides is at the discretion of the organisers and may only be approved if the walling does not exceed one third of the total run of meterage of each open side. Therefore, two thirds of the run must be open or made from transparent material.

We strongly recommend that any outside panels are branded. We reserve the right to brand any exposed shell panels with Breakbulk branding.

For assistance, please contact Gielissen at [breakbulk@gielissen.com](mailto:breakbulk@gielissen.com) or call +31 40 235 3820.

## **CARPET**

All Shell Scheme stands are carpeted with standard 1x1 dark grey/anthracite carpet tiles.

**Please note:** If you choose to fix your own carpet, only tape, which does not mark the floor is permitted. All carpet tape must be removed during breakdown and a dilapidation charge will be levied for any stand not complying or marking the venue floor.

## CORNER STANDS

All corner stands have 2 open sides. If you prefer to have one side closed you may only have up to 1/3 of any open side enclosed with solid walling, please advise the organisers in writing with acknowledgement of receipt and we will get back to with a final decision.

## FASCIA PANEL

Your company name will be fitted to the fascia board, one per open side. You can specify your name requirement via [Gielissen Exhibitor Webshop](#). Failure to submit this information may result in an inaccurate name displayed on your stand and there maybe charges or a delay on site to rectify this.

If our official stand contactor Gielissen does not receive your requirements for your name board (fascia text) before the deadline, the company name as mentioned on the organiser's exhibitor list will be used. Any costs involved will be charged directly to the exhibitor.

If you intend to construct a stand interior within your Shell Scheme stand or are preparing your own graphics, please liaise with Gielissen regarding the exact internal measurements to avoid discrepancies onsite.

Please note there is a maximum of **25 characters on each fascia board** including spaces.

## GRAPHICS

Gielissen offers an opportunity to upgrade your shell scheme panels to the printed panel using your artwork, this eliminates the need to produce banners to dress the stand. We recommend uploading your artwork directly via [WeTransfer](#) (or another cloud-based service for sending large files, such as Dropbox or OneDrive) to [breakbulk@gielissen.com](mailto:breakbulk@gielissen.com). Please ensure to include your company name and stand number when sending.

Graphics will be charged according to the deadline dates from when they are submitted to Gielissen under the condition the graphic file is sent before the next deadline otherwise orders will be charged according to price after the deadline. For early bird graphic order rates, the graphic file must be sent before regular deadline. For the regular graphic order rates, the graphic file must be sent before shop closing date.

All graphic orders and graphic files should be received by **Thursday, 7<sup>th</sup> May 2026** before the webshop closes on Monday 8<sup>th</sup> June 2026 deadline. Any request for orders after this date cannot be guaranteed and a surcharge may be applicable. **Please note that if Gielissen receive artwork files in wrong measurements or poor quality, Gielissen cannot guarantee printing.**

Please refer to the Gielissen Artwork Specifications in the webshop under **Tab 6: Graphic Expressions** for more information.

## PANEL DIMENSIONS

**Please note:** If ordering graphics through an outside contractor, please get in touch with Gielissen to confirm panel sizes and accurate dimensions. Incorrect graphic dimensions can cause issues on site and effect the appearance of a stand.

## STAND PACKAGES AND VISUALS

This visual is only a representation of your stand, your allocated space may vary in size and orientation. Please check your contract for exact stand size.

### Shell Scheme Stand up to and included 9 - 17 sqm contains:

- Aluminium fascia board, 30cm high with white panels, 25 cm high and logo on each open side of fascia 20 x 30 cm
- Dark grey/Anthracite carpet tiles
- A stand number and company name in Universe 67 bold font on each open side
- 1 table and 2 chairs
- 1 waste bin

### Shell Scheme Stands 18 - 26 sqm contains:

- Aluminium fascia board, 30 cm high with white panels, 25 cm high and logo on each side of fascia 20 x 30 cm
  - Dark grey/Anthracite carpet tiles
- A stand number and company name in Universe 67 bold font on each open side
  - 2 tables and 4 chairs
  - 2 waste bins

### Shell Scheme Stands 27 - 35 sqm contains:

- Aluminium fascia board, 30cm high with white panels
- 25 cm high and logo on each side of fascia 20 x 30 cm
- Dark Grey/Anthracite carpet tiles
- A stand number and company name in Universe 67 bold font on each open side
- 3 tables and 6 chairs
- 3 waste bins

### Shell Scheme Stands 36+ sqm contains:

- Aluminium fascia board, 30 cm high with white panels, 25 cm high and logo on each open side of fascia 20 x 30 cm
  - Dark grey/Anthracite carpet tiles
- A stand number and company name in Universe 67 bold font on each open side
  - 4 tables and 8 chairs
  - 4 waste bins

### Furniture inclusion per stand size:

Size in m2	Fascia Board per open side	Logo per open side	Carpet	Table white	Chair anthracite	Trash Bin
0-17	1	1	incl	1	2	1
18-26	1	1	incl	2	4	2
27-35	1	1	incl	3	6	3
36 - >	1	1	incl	4	8	4

## GIELISSEN STAND CONFIGURATOR

Gielissen are pleased to introduce their brand-new feature for this year's show: the **Stand Configurator**. This intuitive tool helps you visualise and customise your stand layout with just a few clicks. Whether you're working with a **Shell Scheme** or a **Space Only** stand, the Configurator makes planning easier, faster and more accurate.

### What You Can Do with the Stand Configurator

The Stand Configurator gives exhibitors full control over their stand design, allowing you to:

- **Visualise your layout** instantly with real-time 3D previews
- **Customise your booth** by adjusting walls, flooring, colours and finishes
- **Drag and drop items** such as furniture, shelving, counters, plants and accessories
- **Experiment with layouts** using a pre-selected 6m x 3m shell scheme template
- **See cost estimates** as you build, giving you budget clarity from the start
- **Share your design** easily with colleagues or contractors for smoother collaboration

It's designed to remove guesswork, eliminate repeated revisions and give you a clear picture of your stand before ordering any services.

After logging in, select the top left-hand tab in the menu to open the Stand Configurator (example below):

After entering the Stand Configurator, you can use the top navigation tabs to browse the different services. From here, you can add items in real time, including furniture, extras, and accessories to build and preview your stand layout instantly.

As the official general contractor, Gielissen is committed to supporting you throughout your Breakbulk Europe 2026 journey. Their team is available to assist with stand design, build, ordering, custom requests and on-site coordination.

If you have any questions or need guidance as you prepare, please contact: [breakbulk@gielissen.com](mailto:breakbulk@gielissen.com)

We look forward to welcoming you to Rotterdam for the 2026 Breakbulk Europe edition, 16-18 June!
